

QUALITY & ENVIRONMENTAL POLICY

31st January 2017

Issue 2

Future Advanced Manufacture Ltd are precision engineers, specialising in the manufacture of components of high complexity and integrity, such as technical components and assemblies, jigs, fixtures, tools and fabrications for high technology markets. The nature of the company's activities places particular emphasis on experience, expertise, capability, safety, reliability and quality.

The continuing Policy of the board of directors of Future Advanced Manufacture Ltd is to promote continuous improvement in the effectiveness of its processes, to comply with all Customer, Statutory & Regulatory requirements and legislations, to empower employees to achieve business & professional goals, to establish and address the risks to the business and all interested parties as well as understand the opportunities to achieve improvements.

We enable this by maintaining a **Flexible Business Structure**, capable of adapting to continuous change, employing an effective Quality Management System, planned and developed in conjunction with all management functions, using cost effective systems and practices which satisfy the requirements of AS/EN 9100, ISO 9001:2015 and ISO 14001:2015 standards, to promote:

- ✦ Investment in our Personnel through training and development of skills and knowledge
- ✦ Expansion of the Company's order books through repeat business
- ✦ Expansion of the Company's customer base
- ✦ Reduction of Customer complaints
- ✦ Reduction of the potential damage to the Company of Product Liability Claims
- ✦ Application of the Company's internal Quality Information System
- ✦ A strenuous approach to good Health, Safety and Environmental Practices

In order to promote continuous improvement in these aims, certain key performance indicators (considered to be key quality objectives which relate to the above) have been set and measured. Commitment by all members of the company to these ongoing measures, together with the operation of the policies defined within the quality manual and the identification to top management of all incidences of product or process non-conformance will ensure improvement. **Future Advanced Manufacture Ltd** will ensure that all management, technical and production personnel are fully conversant with these objectives, through ongoing educational programmes

QUALITY & ENVIRONMENTAL POLICY

31st January 2017

Issue 2

At **Future Advanced Manufacture Ltd** we also recognise our key Environmental Aspects are:

- ✚ energy use
- ✚ raw material use and its disposal
- ✚ waste generation
- ✚ procurement

In order to reduce our impact on the Environment, **Future Advanced Manufacture Ltd** will:

- ✚ adopt the highest environmental standards in all areas of operation, meeting or exceeding all relevant legislative requirements
- ✚ be fully committed to the prevention of pollution
- ✚ assess our organisational activities and identify areas where we can minimise impacts
- ✚ minimise waste through careful and efficient use of all materials and energy
- ✚ purchase sustainable products wherever feasible
- ✚ train our employees in good environmental practice and encourage employee involvement in environmental action
- ✚ reduce risk from environmental, health or safety hazards for employees and others in the vicinity of our operations
- ✚ include environmental and ethical considerations in investment decisions where appropriate
- ✚ continually assess the environmental impact of all our operations

This policy has been reviewed and agreed at by the Board of Directors at Future Advanced Manufacture and came into effect immediately on the date shown herein.

Craig Peterson,

Chief Executive Officer
