

QUALITY & ENVIRONMENTAL POLICY

22nd December 2022

Issue.6

Future Advanced Manufacture Ltd are precision engineers, specialising in the manufacture of components of high complexity and integrity, such as technical components and assemblies, jigs, fixtures, tools and fabrications for high technology markets.

The continuing policy of the Senior Management Team of Future Advanced Manufacture Ltd is to promote continuous improvement in the effectiveness of its processes, to comply with all Customer, Statutory & Regulatory requirements and legislations, to empower employees to achieve business & professional goals, to establish and address the risks to the business and all interested parties as well as understand the opportunities to achieve improvements.

We enable this by maintaining a flexible business structure, capable of adapting to continuous change, employing an effective Quality Management System, planned and developed in conjunction with all management functions, using cost effective systems and practices which satisfy the requirements of the company's accreditations and form the company objectives;

-  Reduction in Customer complaints
-  Improving First Part Yield (Internally)
-  Measurement and Analysis of the Supply Chain
-  Operational Health and Safety
-  Expansion and Diversity of the company's customer base

In order to promote continuous improvement in these aims, certain key performance indicators have been set and measured against the PEAR structure reviewed frequently within Management Review. Commitment by all members of the company to these ongoing measures, together with the operation of the policies defined within the quality manual and the identification to top management of all incidences of product or process non-conformance will ensure compliance and drive improvement initiatives. Future Advanced Manufacture Ltd will ensure that all management, technical and production personnel are fully understanding of this policy.

QUALITY & ENVIRONMENTAL POLICY

22nd December 2022

Issue.6

At **Future Advanced Manufacture Ltd** we also recognise our key Environmental Aspects are:

-  energy use
-  raw material use and its disposal
-  waste generation
-  procurement

In order to reduce our impact on the Environment, **Future Advanced Manufacture Ltd** will:

-  adopt the highest environmental standards in all areas of operation, meeting or exceeding all relevant legislative requirements
-  be fully committed to the prevention of pollution
-  assess our organisational activities and identify areas where we can minimise impacts
-  minimise waste through careful and efficient use of all materials and energy
-  purchase sustainable products wherever feasible
-  train our employees in good environmental practice
-  reduce risk from environmental, health or safety hazards for employees and others in the vicinity of our operations
-  include environmental and ethical considerations in investment decisions where appropriate
-  continually assess the environmental impact of all our operations

This policy has been reviewed and agreed by the Senior Management Team at Future Advanced Manufacture and came into effect immediately on the date shown herein.
